

Vacuum Filtration System

Features

► **Compact and safe operation**

Lafil 300 is a unique filtration system by combining vacuum source with filtration ware. Its compact design can save much bench space than the traditional ones. With a fence-like platform design, it can prevent user's negligence from tipping over the waste bottle.

► **The patented spin-lock design**

The filter holder can be connected with waste bottle by patented spin-lock connection giving a fast and stable installation without clamp.

► **Overflow protection**

The waste bottle comes with a built-in overflow protection to keep the filtrate from overflowing when it is full.

► **Autoclavable and shatterproof**

The waste bottle and filter holder are made of engineering plastics and SS316 stainless steel which are shatterproof, high temperature resistance and autoclavable.

► **International certification**

CE certification

► **Two-Year Warranty (Lafil 300)**

Lafil 300 - LF 30

Lafil 300 - SF 10

Applications

- Vacuum filtration
- Suspended solid test
- Microbiological test
