

KA-19710 ALCOHOL ANALYZER NON-CONTACT

Features

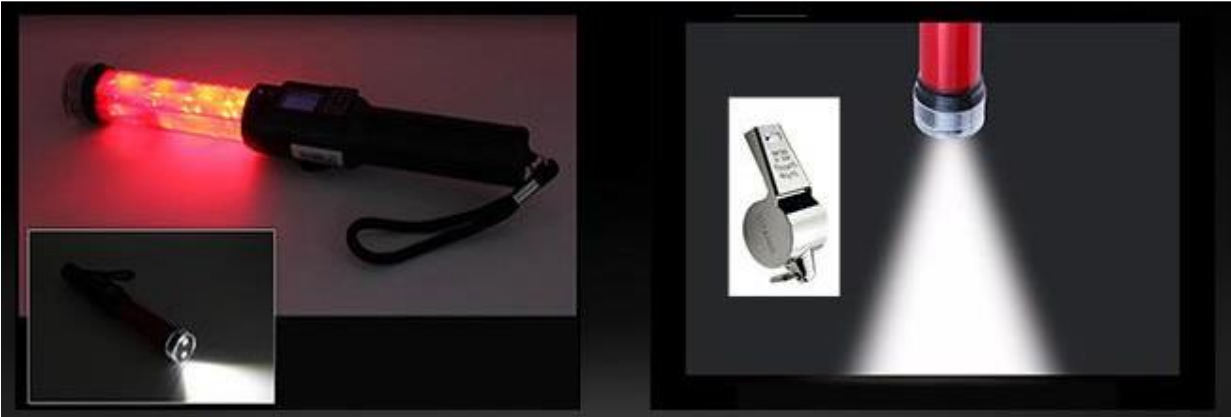

- 32-bit MCU.
- Fuel cell sensor UK Make
- Test assets and liabilities.
- Rapid heating, response and recovery.
- With Traffic baton and flashlight illumination function
- Rapid and convenient, do not need mouthpieces;
- Large battery capacity, can do testing for 8 hours.

Technical data

Details	Technical Data
Principle of measurement	Electrochemical Sensor, alcohol-specific For quick testing, automatic sampling
Measurement Range	0.00-2.00mg/L(0-440mg/100ml) 0.00-0.40% BAC
Test Mode	
Way of Breath Sample Extraction	Motor continuous air extraction, speed no less than 0.8L
Temperature Range-operation	-5°C ~ +45°C
Temperature Range-storage	-30°C ~ 70°C
Measuring Time	Adjustable(Minimum time: 1 second)
Working Pressure	600 ~ 1400hPa
Working Temperature	20 ~ 98%r.h.
Screen	OLED Digital Screen
Battery:	Rechargeable, 3.7V/30000mAh
Continuos working time	8 Hours +
Vibration Alarm	Yes
Test Distance	Blowing Distance 4-5cm
Analysing Time	Less than 5 second

Can be used as

- *Alcohol Tester*
- *Light Stick Whistle*

NON-Contact Type
No need of Mouth-piece
